being intended to stimulate collagen synthesis.

20

25

7. Use according to any one of the preceding claims, characterized in that the cinnamic acid derivatives are chosen from mono- and polyhydroxycinnamic acids, alcohols, aldehydes, esters and derivatives.

5 8. Use according to any one of the preceding claims, characterized in that the cinnamic acid or one of its derivatives is present in an amount ranging from  $10^{-6}\%$  to 10% of the total weight of the composition.

10 9. Use according to any one of the preceding claims, characterized in that the cinnamic acid or one of its derivatives is present in an amount ranging from  $10^{-3}\%$  to 5% of the total weight of the composition.

15 10. Use according to any one of the preceding claims, characterized in that the cinnamic acid or one of its derivatives is combined with another product which stimulates collagen synthesis.

20 11. Use according to the preceding claim, characterized in that the other product which stimulates collagen synthesis is chosen from plant hormones and/or vitamin C or its derivatives.

12. Use according to the preceding claim, characterized in that the plant hormone is an auxin.

13. Use according to the preceding claim, characterized in that the auxin is chosen from

25 3-indoleacetic acid (IAA), 4-chloro-3-indoleacetic acid (4-Cl-IAA), phenylacetic acid (PAA), 3-indolebutyric acid (IBA), 2,4-dichlorophenoxyacetic acid (2,4-D),

0988015 052504  
105290 51088860

14. Use according to the preceding claim,  
characterized in that the auxin is  $\beta$ -naphthoxyacetic  
acid.

10                    16.    Use according to the preceding claim,  
characterized in that the product which stimulates lipid  
synthesis is a plant hormone as defined in Claims 12 to  
14.

18. Cosmetic firming composition comprising,  
in a cosmetically acceptable medium, at least an  
effective amount of cinnamic acid or of at least one of  
its derivatives.

20. Cosmetic composition for tightening the

skin comprising, in a cosmetically acceptable medium, at least an effective amount of cinnamic acid or of at least one of its derivatives.

21. Cosmetic composition for combating the  
5 effects of the menopause on the skin, comprising, in a cosmetically acceptable medium, at least an effective amount of cinnamic acid or of at least one of its derivatives.

22. Cosmetic composition for combating the  
10 effects of the menopause on collagen, comprising, in a cosmetically acceptable medium, at least an effective amount of cinnamic acid or of at least one of its derivatives.

23. Cosmetic composition comprising, in a  
15 cosmetically acceptable medium, at least an effective amount of cinnamic acid or of at least one of its derivatives and at least one other product which stimulates collagen synthesis.

24. Composition according to the preceding  
20 claim, characterized in that the product which stimulates collagen synthesis is chosen from plant hormones and vitamin C and its derivatives.

25. Cosmetic composition comprising, in a  
25 cosmetically acceptable medium, at least an effective amount of cinnamic acid or of at least one of its derivatives and a compound which stimulates lipid synthesis.

26. Composition according to the preceding

0000015 06504  
T05290 57088800

claim, characterized in that the compound which stimulates lipid synthesis is a plant hormone.
